

RAMIRO DI FRAIA

Full Stack Developer · Angular · TypeScript · NestJS

Lanus, Buenos Aires, Argentina · +54 11 6812-1998 · ramirodifraia@gmail.com · LinkedIn · GitHub · Portfolio

Available for remote positions · full-time or freelance

PROFESSIONAL SUMMARY

Full Stack Developer specialized in **Angular and TypeScript**, with hands-on experience building scalable web applications using NestJS, Supabase, and Ionic. Shipped multiple production projects integrating JWT authentication, role-based access control, real-time features, and data visualization. Final-year student of the Programming Technician degree (UTN), with a strong foundation in RESTful architectures, design patterns, and agile methodologies. Available to contribute from day one.

TECH STACK

Angular 16+	TypeScript	NestJS	Ionic	RxJS	Supabase	MongoDB
PostgreSQL	JWT / Auth	REST API	Chart.js	Tailwind CSS	Bootstrap	Git / GitHub
PWA	WebSockets	Vercel / Render	Node.js	Express	Postman	Scrum / Kanban

Methodologies: Scrum · Kanban · UML · Design Patterns (Strategy, Observer, Template Method) · Clean Code

FEATURED PROJECTS

TCG Social — Full Stack Social Network for TCG Players · [Live Demo](#)

Angular · TypeScript · NestJS · MongoDB · JWT · Chart.js · PWA · Vercel + Render

- › Built a full stack platform for Yu-Gi-Oh!, Pokemon, and Magic: The Gathering communities with a decoupled Angular + NestJS + MongoDB architecture, deployed to production.
- › Implemented JWT authentication, custom user profiles, real-time messaging via WebSockets, and an admin dashboard with Chart.js data visualizations.
- › Integrated PWA features for offline support and native-like mobile experience.

Game Room — Web Mini-Games Platform · [Live Demo](#) · [GitHub](#)

Angular · TypeScript · Bootstrap · Firebase Auth · Firestore

- › Developed an interactive multi-game platform (Hangman, Higher or Lower) with user authentication and a persistent score leaderboard.
- › Applied responsive design with Bootstrap ensuring a consistent experience across desktop and mobile devices.

EDUCATION

University Technician in Programming — UTN Avellaneda · 2024 – Present (final year)

- › Key courses: Programming 4 (Angular/TypeScript), Programming 3 (HTML/CSS/JS), Systems Methodology II, Databases.
- › Academic projects applying full UML modeling and design patterns: Strategy, Observer, Template Method.

ADDITIONAL SKILLS

- › Independent problem-solving: advanced debugging, performance optimization, and production troubleshooting.
- › Continuous self-directed learning: proven ability to adopt new technologies independently based on project needs.
- › Languages: Spanish (native) · English (advanced technical reading: documentation, Stack Overflow, repositories).
